

Dear Chairman;I would like to express my concern regarding satellite radios fight with NAB. We who 'subscribe' to XM or Sirius do so voluntarily for specific reasons, either coverage is incomplete in our areas from other media and or the choices offered are less than what we would like to listen to for 'free'! I think the NAB should be more concerned with improving what they have to offer rather than trying to get 'OUR' gov't to suppress competition! Please bear in mind that we pay to recieve these services and feel that it is at the very least an extension of our free speech to do so.

I believe organizing cell phone services, for example, would be a much better use of our tax dollars than keeping NAB safe in their little world.

Sincerley Dennis Deputy
tax paying sat radio consumer and loving it!!!!
